WARNINGS BEFORE YOU OR YOUR CHILD PLAY VIDEO GAMES

⚠️ WARNING - Seizures

- Some people (about 1 in 4000) may have seizures or blackouts triggered by light flashes or patterns, such as while watching TV or playing video games, even if they have never had a seizure before.
- Anyone who has had a seizure, loss of awareness, or other symptom linked to an epileptic condition should consult a doctor before playing a video game.
- Parents should watch when their children play video games. Stop playing and consult a doctor if you or your child have any of the following symptoms:
  - Convulsions
  - Eye or muscle twitching
  - Loss of awareness
  - Altered vision
  - Involuntary movements
  - Disorientation

To reduce the likelihood of a seizure when playing video games:
1. Sit or stand as far from the screen as possible.
2. Play video games on the smallest available television screen.
3. Do not play if you are tired or need sleep.
4. Play in a well-lit room.
5. Take a 10 to 15 minute break every hour.

⚠️ WARNING - Repetitive Motion Injuries and Eyestrain

Playing video games can make your muscles, joints, skin or eyes hurt after a few hours. Follow these instructions to avoid problems such as tendinitis, carpal tunnel syndrome, skin irritation or eyestrain:

- Avoid excessive play. It is recommended that parents monitor their children for appropriate play.
- Take a 10 to 15 minute break every hour, even if you don't think you need it.
- If your hands, wrists, arms or eyes become tired or sore while playing, stop and rest them for several hours before playing again.
- If you continue to have sore hands, wrists, arms or eyes during or after play, stop playing and see a doctor.

⚠️ WARNING - Electric Shock

To avoid electric shock when you use this system:
- Do not use the Nintendo GameCube during a lightning storm. There may be a risk of electric shock from lightning.
- Use only the AC adapter that comes with your system.
- Do not use the AC adapter if it has damaged, split or broken cords or wires.
- Make sure that the AC adapter cord is fully inserted into the wall outlet or extension cord.
- Always carefully disconnect all plugs by pulling on the plug and not on the cord. Make sure the Nintendo GameCube power switch is turned OFF before removing the AC adapter cord from an outlet.

⚠️ CAUTION - Motion Sickness

Playing video games can cause motion sickness. If you or your child feel dizzy or nauseous when playing video games with this system, stop playing and rest. Do not drive or engage in other demanding activity until you feel better.

Caution - Use of controls or adjustments or procedures other than those specified herein may result in hazardous radiation exposure.

CONTROLLER NEUTRAL POSITION RESET

If the L or R Buttons are pressed or the Control Stick or C Stick are moved out of neutral position when the power is turned ON, those positions will be set as the neutral position, causing incorrect game control during game play.
To reset the controller, release all buttons and sticks to allow them to return to the correct neutral position, then hold down the X, Y and START/PAUSE Buttons simultaneously for 3 seconds.
GETTING STARTED

Insert the Game Disc and a Memory Card into the Nintendo GameCube, close the Disc Cover, and turn the power ON.

When playing the game for the first time, follow the instructions on the screen and create a “Super Mario Strikers” game file on the Memory Card inserted in Slot A. (Do not use Slot B.)

*This game uses only Memory Card Slot A.

When you play from the saved data

When you start the game, your Nintendo GameCube will automatically load your saved data from the Memory Card before proceeding to the title screen.

About Saving Your Data...

This game saves your data automatically. However, you can also save manually by choosing SAVE in the Option menu (pg. 26). To save your data, your Memory Card must have at least 5 free blocks.

Do not remove the Memory Card and/or turn OFF the POWER while saving. It may cause damage to your Nintendo GameCube and/or the Memory Card.

*See the Nintendo GameCube Instruction Booklet for directions on how to format and erase Memory Card files.

Certain actions require multiple buttons: for example, when you see △ + A, press the A Button while pressing and holding the △ Button at the same time.
These actions can be performed during game play. Practice these maneuvers to master using the right action for the right situation. Have Fun!

**Move / Turbo Run**
Move the player by pressing the Control Stick in the desired direction. Press the B Button while tilting the (Control Stick) to do a Turbo Run. While you are using the Turbo Run, it will be easier for your opponents to steal the ball, so watch out.

**Deke Move**
Press the A Button or tilt the C Stick while running to evade an opponent’s tackle. Perfect your timing and use this when an opposing player comes near!

**Switching Characters**
Press the A Button when your team doesn’t have the ball to switch control to the defending player on your team who is closest to the ball. Use this for quick defensive switches.

**Slide Tackle**
While on defense, press the B Button to slide your player toward the opponent. Perfect this move to steal the ball from your opponent! Practice slide tackling to intercept the opposing team’s passes.

**Big Hit**
While on defense, press the A Button to perform the Big Hit. Use this on opposing players to knock them down and smash the ball free. However, if you tackle an opponent who does not have the ball, your opponent will earn a Power-Up Item.

**Clear**
To clear the ball, press the B Button when you have the ball in home territory or press the B Button before touching a ball that becomes free in home territory. Use this when you are surrounded by opposing players to quickly clear the ball.

**Lob Pass**

Hold the B Button and press the A Button when you have the ball to make a Lob Pass. Making a Lob Pass near the opponent's goal passes the ball to a nearby teammate.

Hold the B Button and press the B Button when you have the ball to make a Lob Shot. This can be an effective strategy when the opponent's goalie has moved up from the net.

**One-Touch Pass**

Pressing the A button just before you touch the ball will cause the player to perform a One-Touch Pass without dribbling the ball.

**One-Timer Shot**

Pressing the B Button while approaching a ball or while receiving a pass will cause the player to perform a One-Timer Shot without dribbling the ball. Try doing a One-Timer Shot during a Lob Pass to perform an exciting acrobatic shot on goal.

**Perfect Pass & Perfect Shot**

Passing to an open teammate close to the opponent's goal will execute a Perfect Pass. Shooting directly from a Perfect Pass blasts a high-powered Perfect Shot goal attempt.
Using Power-Up Items

Pressing the \( \text{□} \) Button when you have an item will use the item. When you have 2 items, use the \( \text{□} \) Button to select which item to use.

Super Strike

Only captains can pull off this ultimate shot, and only when shooting the ball from the opposing team’s territory. This very powerful shot counts for two points if it goes in! However, during the beginning of this shot you are susceptible to opposing team attacks. Try to do this move when no opposing players are in the area.

1. Once you’ve fully charged your shot, a gauge will appear on-screen. Press the \( \text{B} \) Button as soon as the white needle enters the green section of the gauge.

2. Another green band will appear on the right of the gauge. Use your best timing skills, and press the \( \text{B} \) Button once the white needle enters this new green area.

3. If you pull this off, you’ll trigger a Super Strike. Perfecting the Super Strike depends on your timing and ability to stop the white needle in the green bands of the meter. Master your timing and prepare for a MONSTER shot on the goal!
